

## Solutions for Impacts of COVID-19

### Recover Lost Revenue

Hospitals have been greatly impacted by the effects of the global pandemic. It is likely that hospitals can anticipate many unpaid and aged claims from 2020, due to the nature of the lag in systems and personnel recovery time.

**Fortunately, ERISA Recovery has great experience in recovering aged claims.**

We are well-positioned to step in as a partner and formulate a plan best for your team and system to appeal and recover past claims as well as anticipate the unpaid claims from the chaos of the past year.

This is a challenging time for hospital systems, and we'd like to help where we can. Through our Federal ERISA appeals process, **we can go back 6-10 years and recover lost income from aged claims.** We collect where others can't.

## Case Study

- Client **onboarded August 2020**
- In first 120 days Erisa Recovery **reclaimed more than \$1.1M**
- First appeal was won in 3 weeks
- An additional \$1.2M in appeals now and \$8.2M in evaluation for appeal

- Filed the **first appeal within 3 days** of receiving client's reports
- Recoveries were generated from **1- to 4-year old claims**
- Notice how revenues continue to grow - revenues are guaranteed to increase with consistent reporting
